SUMMARY

Final-year BSc CSIT student and backend developer specializing in Django. Built and shipped multiple production-style, multi-role web platforms with real payment gateway integrations (eSewa, Khalti), REST APIs, and a custom recommendation engine. Comfortable owning a feature end-to-end — from data model to deployment-ready code.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML/CSS, Tailwind CSS, SQL
Backend: Django, Django REST Framework, Celery, JWT Authentication
Payments: eSewa (HMAC-SHA256), Khalti
Design: Adobe Illustrator, Vector Design, Typography, Color Theory, Logo Creation
Tools: Git, GitHub, Swagger/drf-spectacular, Postman, PowerShell
Data Mining: Decision Trees (ID3), Apriori, FP-Growth, Naive Bayes (WEKA)

EXPERIENCE

Intern — Wireless Services Directorate 2026 — Present

Nepal Telecom, Central Office, Babarmahal, Kathmandu

- Assisting with monitoring, maintenance, and troubleshooting of wireless network infrastructure
- Supporting configuration and testing tasks related to wireless services under senior engineers' guidance
- Gaining hands-on exposure to telecom-grade network operations and infrastructure documentation

PROJECTS

HostelHub — Django Hostel Booking Platform *Personal Project*

Multi-role platform (Student / Owner / Admin) with full booking lifecycle

- Built role-based dashboards for students, hostel owners, and admins with distinct permissions and workflows
- Integrated eSewa payment gateway using HMAC-SHA256 signature verification, routed through a single admin merchant account
- Designed a Payment model tied to the booking lifecycle (pending, approved, paid) with sandbox testing
- Implemented a content-based recommendation engine using a custom weighted-distance KNN algorithm across categorical (location, room type) and continuous (price) features
- Built hostel listing pages with search, filtering, and pagination; resolved cross-browser rendering issues

TutorHub — Django Tutor Booking Platform *Personal Project*

Multi-role platform (Student / Tutor / Admin) connecting students with tutors

- Built role-based accounts (Student, Tutor, Admin) with OTP-based email verification
- Designed tutor profiles with subjects, location, hourly fee, and an approval workflow (pending/approved/rejected)
- Implemented a booking system with status tracking, payment status, and eSewa payment integration
- Built a review/rating system and an in-app notification system for booking updates

Gym Management System — Django REST Framework *Personal Project*

REST API backend with JWT authentication and async task processing

- Built REST APIs with Django REST Framework and JWT-based authentication
- Implemented background task processing with Celery and django-celery-beat
- Documented all endpoints with drf-spectacular (Swagger UI)
- Integrated Khalti payment gateway end-to-end (InitiatePaymentView, VerifyPaymentView), tested via Swagger UI in sandbox mode

Buy-Me-a-Coffee Clone — Django *Personal Project*

- Set up and debugged a cloned Django project using the uv package manager; configured Khalti test credentials and verified the payment flow end-to-end

CERTIFICATIONS

Graphic Design (Adobe Illustrator) Course — Code IT

Completed a hands-on course covering graphic design fundamentals, Adobe Illustrator tools, vector design, logo creation, typography, color theory, and real-world projects. (January 2026)

Web Design Course — Code IT

Completed a hands-on course covering web design fundamentals, HTML, CSS, Tailwind CSS, JavaScript (ES6), DOM manipulation, semantic coding practices, and web hosting deployment. (February 2026)

Python with Django Training — Kathmandu Metropolitan City

Completed a hands-on Python with Django training program under the Office of Municipal Executive, Kathmandu Metropolitan City, Bagmati Province. (April 2026 – July 2026)

EDUCATION

BSc CSIT (Final Year — 8th Semester)

Expected 2026

Patan Multiple Campus, Tribhuvan University
